[GitHub](#) and [LinkedIn](#)

Solutions-driven Web Developer applying customer service background and newly learned technical skillset towards building functional full-stack web applications. Extensive experience in customer service and a track record of positive client relations bringing enthusiasm, dedication, and an exceptional work ethic. Recently completed a certificate in Full Stack Web Development at the University in Texas at Austin. Currently furthering knowledge through post-course activities to combine my customer experience into a new profession of web development. Outgoing, adaptable, and reliable.

Technical Skills

Languages: JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, GraphQL,

Applications: GitHub, MongoDB, MySQL

Tools: Express, React, Node, Handlebars, Query, Bootstrap

PROJECTS

Pro Pairs | [Written URL to GitHub](#) | [Deployed through Heroku](#)

- Pro Pairs is a web application that matches compatible teammates for group projects based on their Myers-Briggs personality types. The application allows users to see their compatibility rating against each user while creating a team, and view ratings for full teams. It is hosted on a secure server and can be accessed from any device with an internet connection.
- Role: Team Leader/ Front End Development
- Tools: HTML, CSS, JavaScript, React Bootstrap, React, Material UI, Node, Express, MongoDB, Mongoose, Bcrypt, Heroku, MondoDB Atlas

Trivia Tracker | [Written URL to GitHub](#) | [Deployed through Heroku](#)

- Trivia Game is an application for entertainment. Test your knowledge of random facts! Answer questions and see how you rank on the scoreboard!
- Role: Team Leader/ Full-Stack Development
- Tools: HTML, CSS, JavaScript, Handlebars.js, Node.js, Express.js, MySQL, Sequelize, bcrypt, Bootstrap, questions from the-trivia-api.com, image from tenor.com, animation from animate.style

Drink of the Day | [Written URL to GitHub](#) | [Deployed through GitHub](#)

- Today's Drink is an application that suggests a beverage for a location based on the current weather conditions. Users can search for a location by city name and the app will display current weather conditions and suggest an ingredient. Alternatively, bypass the weather search all together and select an ingredient from the options- the application will display a curated list of beverage recipes.
 - Role: Team Leader/ Javascript
 - Tools: HTML, CSS, JavaScript, Bulma
